**TASTE SO GOOD**  
**JANES'**  
Chocolates and Bonbons  
514 NINTH STREET N. W.  
We give Herald \$25,000 contest votes.

## Topics of Interest to Every Woman

EDITED BY JULIA CHANDLER MANZ.

### WHERE SMALL VALUE IS PLACED ON LIFE

God Never Meant Us to Be Tied Down Like Man-Made Machines.

By FRANCES SHAFER.

Probably in the course of time mechanical engineers and others who are working upon the great problem of eliminating waste motions and of reducing the time consumed by workers in the world of industry will have reached the point for which they are striving, and every turn of the hand, every movement of the body, will count in increased production and greater gain in dollars and cents.

But what of the human worker?

A while ago I read of a manufacturing concern in the East that had installed a motion picture camera in its plant for the purpose of analyzing the motions of every worker engaged in the process of producing. "Close by each worker is a large clock, whose subdivisions of time are so finely arranged that by carefully taking motion pictures of the clock and of the worker at the machine, at the same time these efficiency engineers are able to determine the time required for a single motion. It is very minute, very exact, and the clock is used for measuring human energy, so fine that they can reckon to the two-thousandth part of a minute the time consumed by a single motion. Wonderful, is it not?"

Then, with stereoscopic views of the workers taken by these motion picture machines, the efficiency engineers are equipped to sit at their desks and study the way in which the worker makes motions and to make every stroke tell.

**Become Merely Machines.**

Sitting there in their quiet room, with the problem well before them, they watch these films and the swiftly moving figures, and somehow the human end of the question is forgotten, and the whole thing assumes the aspect of machinery.

They see a worker who reaches out too far for a tool that he needs, and they say that tool must be set closer. They note that his motions are well ordered, that one comes next where it should be second, and they plan—those motions must be arranged in better economic sequence. They find that materials are not near at hand, and they conclude—those things must be brought within easy-reaching range. Because the waste of time and of energy are sinful.

And when they have worked out their problem to its clearest finish, they are right well pleased with themselves, very proud of what science and brains can do.

For, by this micro-motion study, as they call it, they have cut by two-thirds the time required for the manufacture of goods, and, in some instances, even more. They tell these efficiency engineers that by making every motion count, they have saved the company money to make seven seconds do the work of the one-time thirty.

**Set in a Prison.**

And so much for the men who sit at their desks, dealing with clocks, motion pictures, and clever devices.

But as one thinks of the worker, bound fast to his machine, with no chance to lift his eyebrows or move his eyes from his task, it seems that these skilled men, with their scientific management, have taken God's "noisiest work of all" and set him in a prison. And all for the saving of time, which means the saving of money!

There is just one thing more for them to do to prove that their methods are a blessing to the world, and that is to close their desks, go out to these self-same plants and sit at the machines from morning till night. One does not know what would happen, but one really believes that they would yearn for a chance to reach out for a tool, sigh for a little time to throw up their arms in a perfectly useless motion and pray for an opportunity just once in a while to get up and walk a few steps for some needed material.

For, without once having tried it herself, one knows that it is impossible for a man or a woman or a little child to be chained to one set task, day in and day out, with the chain shortened down to the lowest notch, without paying a terrible price. And it is not quite human—not human at all—to measure his motions and figure them down just as if they were parts of well-made machinery, he is oversteering his rights and it is time to stop.

**What Would Women Do?**

One does not know, but sometimes she thinks that women might place a higher value upon human life than that; that while they were thinking of the motions given to waste, they would give some care to the lives at stake, the minds, the hearts, and the nerves of the workers.

For if they entered the great world of work with the same thoughts of money filling their heads, the same mania for eliminating false motions and of keeping the worker's nerves keyed up by clocks and other devices to push him along—then some of us would not care to see them serving as efficiency engineers and in similar capacities.

God made this a very beautiful world, the big fields underneath and the great sky overhead. And He never meant us to tie ourselves down like man-made machines.

And He never planned for the harnessing out of these nerve-heating motions, just to save a little time. Else why the glorious flowers to pluck by the wayside; why the beauty, the fragrance, the nature playthings at every hand? And why the love, the need, and the craving for variety and motion?

**White Mountain Frosting.**

Put one cupful of sugar and one-third cupful of boiling water in a saucepan. Place on range, bring to the boiling point, and let boil, without stirring until sirup will spin a thread. Pour sirup gradually while beating constantly, one white of one egg, beaten until stiff, but not dry, and continue the beating until mixture is of the right consistency to spread. Flavor with vanilla—Fannie Merritt Farmer, in the Woman's Home Companion.

**DR. PIERCE'S**

**GOLDEN MEDICAL DISCOVERY**

which has been so favorably known for over 40 years. It is now put up in tablet form, as well as liquid, and can be obtained of medicine dealers everywhere or by mail by sending 50 cents in 1c stamps for trial box—address R.V. Pierce, M. D., Buffalo, N.Y.

**THE COMMON SENSE MEDICAL ADVISER**

Book 10000 pages handsomely bound in cloth—treats of Physiology—Hygiene—Anatomy—Medicine and is a complete home physician—Send 31c stamps to R.V. Pierce, Buffalo, N.Y.

### A DELIGHTFUL MENU FOR THE HOME TABLE

With a Little Information on the Origin of the Grain We Use. Corn or Maize for Example.

**BREAKFAST.**  
Cereal with Cream.  
Rice Omelet.  
Muffins. Coffee.

**LUNCHEON.**  
Cheese Crumpets.  
Whole Wheat Bread. Grape Jam.  
Cocoa.

**DINNER.**  
Plank Steak Stuffed.  
Rice Potatoes.  
Waldorf Salad. Cheese Wafers.  
Baked Peas with Cream.  
Coffee.

Cheese Crumpets—Mix one-fourth cup cornstarch, one-half teaspoon salt, and two cups scalded milk thoroughly. Add to one-fourth cup of butter, melted in double boiler. Cook a few minutes, stirring constantly. Add yolks of two eggs, slightly beaten, and one-half cup of cheese cut into bits. When cheese is melted, pour into a buttered shallow pan and cook. Turn onto board, cut into squares, and brown in oven. Serve on crackers.

Plank Steak—Wipe steak with damp cloth, remove skin and fat and lay it flat on a board; moisten three-fourths cup of bread crumbs with stock or hot water, add one teaspoon of salt, dash of pepper, one-half teaspoon chopped parsley. Spread mixture evenly on steak, then roll with the grain, so that it may be rolled across the grain. Tie with cord, turning in the ends. Lay meat on top of a layer of dried onion, carrot and turnip. Pour in enough stock or water to fill pan one inch; cover and bake in a slow oven at least three hours. When done, remove meat, thicken gravy and serve.

**Origins of Grain.**

How many of us know the original source of the grain we use? Corn, or maize, for example, is said to be a native American plant, but investigation shows the name maize seems to have been used by the ancients, who ate the product of a grass called sorghum, or amaranth.

The origin of wheat is believed to be along the coast of the Mediterranean Sea; it was brought to a state of great perfection under the reign of the Chaldeans centuries before the Christian era. Rice originated in India from a grass called *omax-saxina*. It is the staple article of food in that country.

Barley comes from Western Asia, from a grass. Many centuries before the Christian era it was a staple article of food, and was made into a bread called *barley*.

Oats were predominate in Norway and Northern England, and came from a wild grass known as *avena sativa*. For a long time oats were used only as fodder for animals, but under the sturdy management of the Scotch people it became their principal cereal food.

Rye is native along the shores of the Black and Caspian seas and is the hardest of all the cereal plants.

**MODISH FROCK.**

This stylish frock closes at the front and may have long or short sleeves. The three-quarter skirt may be made with empire or regulation waist line. The dress is splendid for general wear and may be developed in serge, cashmere, mohair, or cheviot.

The pattern, No. 604, is cut in sizes 34 to 42 inches, bust measure. Medium size will require 5 yards of 36-inch material.

The above pattern can be obtained by sending 10 cents to the pattern department of The Washington Herald.

There were 144 farmers in attendance upon the "short season" at the George Agricultural College this year, compared with fifty-five when the college was inaugurated six years ago.

## A Human Match Factory

The body contains phosphorus sufficient to make 483,000 matches. Phosphorus is one of fourteen elements composing the body—divided among bones, flesh, nervous system and other organs. The perfect health of body requires a perfect balance of the elements. These elements come from the food we eat—the stomach extracts and distributes them.

But if stomach is deranged—the balance of health is destroyed and the blood does not carry the proper elements to the different organs, and there is blood trouble—nervous trouble—heart trouble. Pain is the hungry cry of deranged organs. Put the liver, stomach and organs of digestion and nutrition into a condition of health. That is just what is done by

## HEBREW ASSOCIATION TO HOLD MASS MEETING

Newly Organized Club Plans to Establish Headquarters Similar to the Y. M. C. A.

The recently organized Young Men's Hebrew Association is making excellent progress. Its membership has increased in leaps and bounds during the comparatively short time the association has been organized, and this in spite of the fact that the contemplated vigorous campaign for increasing the membership has not yet started.

At a meeting yesterday afternoon arrangements were completed for holding a large mass meeting on Sunday afternoon, February 10, at the Jewish Temple.

Among the speakers will be Representative Julius Kahn of California, Representative Henry M. Goldfogle, of New York, Hon. Simon Wolf, Rabbi Abraham Simon, and Frederick A. Hourwich. It is the hope of the organization to establish a headquarters for the young Hebrew men here along the lines of the Y. M. C. A. There are a number of successful Y. M. H. A. organizations in some of the large cities of the country, but only of late has a general campaign been started for a national Y. M. H. A., with the view to having branches in every city of any importance.

Arrangements also were completed at the meeting for a concert and ball to be held at the old Masonic Temple on February 15. Plans soon will be formulated to obtain clubrooms and to place the organization on a firm foundation.

The officers of the Y. M. H. A. are: President, Joseph Stein; vice president, Robert J. Stein; recording secretary, Edward Lewis; financial secretary, Julian Jackson; treasurer, William Roberts, and sergeant-at-arms, S. R. Goldstein. Meetings are held every other Sunday afternoon at the Southern Building.

## LAW STUDENTS DANCE "FRISCO EARTHQUAKE"

New Trot Makes Its Appearance at Georgetown Junior Prom in New Willard.

Fun and frolic held sway in the large ballroom of the New Willard last night when the Georgetown Law School held its junior prom. The lid was off, and turkey trotting, the chicken flip, and the San Francisco earthquake were enjoyed by the students and their friends. Dancing lasted until the early hours of the morning. Refreshments were served at midnight.

The patron and reception committee were Chief Justice and Mrs. H. M. Claiborne, Associate Justice and Mrs. Ashley M. Gould, Associate Justice and Mrs. Daniel T. Wright, Mr. and Mrs. Charles A. Douglas, Mr. and Mrs. D. W. Baker, Mr. and Mrs. Clarence R. Wilson, Mr. and Mrs. John J. Hamilton, Mr. and Mrs. Adolph A. Hoehling, Mr. and Mrs. J. S. Easby-Smith, Mr. and Mrs. Frank J. Hoar, Mr. and Mrs. D. W. O'Donoghue, Mr. and Mrs. Titton, and Mrs. N. S. Nelson.

The committee in charge consisted of J. Newton Brewer, chairman, R. H. Rippe, H. L. Biles, R. Kent, L. Shaw, E. Campbell, G. Bond, C. Baggett, H. B. W. J. Connor, J. L. Peters, and D. Hart.

## SONS OF VETERANS TO DINE FEBRUARY 14

Annual Banquet of Order to Be Held on Larger Scale This Year Than Ever Before.

The Sons of Veterans of the District are to hold their annual banquet at the New Ebbitt, February 14. Preliminary arrangements have been made under the supervision of the Sons of Veterans Club of the District, an organization composed of members of the various camps. The President, F. T. F. Johnson, is a member of Lincoln Camp, No. 2, the secretary, G. W. Sellers, is a member of Our Flag Camp, and the treasurer, C. O. Howard, is a member of Cushing Camp, No. 28.

Among the invited guests, including President Taft and more than twelve members of Congress who are Sons of Veterans, there will be present Commander-in-Chief Ralph Grant, of Hartford, Conn., and Past Commander-in-Chief H. V. Speelman, of Cincinnati, Ohio. Past Commander-in-Chief Maj. E. R. Campbell will be master of ceremonies. Invitations have been extended to the members of all local camps, all members of the order residing or visiting in the city, all sons and grandsons of Union veterans, and also all veterans and members of allied patriotic societies.

## SUBURBAN CLUB ORGANIZES

Permanent Officers Elected—Membership Over 200.

Permanent organization of the Washington Suburban Club was effected last night at Eighth Street Temple. The club has a membership of more than 200 and the list is rapidly being filled out. The Washington Country Clubhouse has been leased for one year, and improvements will be started at once. It is expected that it will be occupied within a month.

Permanent officers elected last night are Henry King, president; D. J. Kaufman, vice president; Morton J. Leach, second vice president; A. D. French, treasurer; R. H. Fisher, secretary; Lee Baumgardner, Joseph Dwyer, Morley Goldberger, James Fischer, Isaac Goldenberg, Charles L. Goldsmith, Henry Goodman, Jerome Meyer, Dr. H. M. Kaufman, Phil King, Simon Lyon, A. D. Marks, Alvin Neumeyer, Gerson Nordlinger, Julius I. Peyer, Louis Simon, David A. Baer, and Alexander Wolf. The club will hold a business meeting each year.

## ETCHINGS ON EXHIBIT

Portrayal of Local Subjects by Tolman at Venable's Galleries.

A number of interesting etchings, representing local subjects and scenes, by Ruel Pardee Tolman, are on exhibition at Venable's galleries, 1223-1225 G Street Northwest, and have evoked favorable comment from critics and art connoisseurs.

Among the specimens there is a winter scene, with the Capitol dome as the background; the Smithsonian Institution tower and trees; Thomas Circle, scenes along the river front, and others. Mr. Tolman's work shows strength, character, and pulsates with life and warmth. His technique and detail execution show painstaking application and study. Mr. Tolman is one of the instructors at the Corcoran Gallery of Art, and his studio is at 1421 F Street Northwest.

## NURSES' HOME OPENS TO-DAY

New Building at Freedmen's Hospital Ready for Occupancy.

Authorities of Freedmen's Hospital announce that the new building, which was recently completed, will be opened to public inspection to-day. The new building is located on the hospital grounds at Fourth and College Streets. It contains sixty rooms, cost \$40,000, and is thoroughly equipped for the comfort of the nurses who will occupy it on Thursday.

## SUBURBS SEEK FREE DELIVERY SERVICE

Subdivisions Near Anacostia to Protest Against Alleged Discrimination of Express Companies.

Since the Anacostia Citizens' Association has been successful, through the assistance given it by The Washington Herald, in obtaining free delivery of express, baggage, and telegrams, citizens of the various suburbs near Anacostia have been inquiring as to whether or not this service will include their territory, and if not, are to consider means whereby this can be accomplished. Some have gone so far as to inquire of the Interstate Commerce Commission regarding this matter, and have been advised that their particular communities will not be included within the free-delivery zone.

It is felt that a discrimination, but the companies concerned have stated that the volume of business does not require such an extensive service. The commission has also advised that the various communities interested will have to file formal complaint before any further action can be taken. The suburbs interested include Congress Heights, Good Hope, and Randle Highlands.

The Ladies' Guild of Emmanuel Episcopal church is to hold an orator supper this evening in the basement of the parish hall, in V Street. Mrs. Franklin S. Glicker is chairman of the committee on arrangements, and all of the various assistants have been selected. A meeting is to be held this afternoon at 2 o'clock, at which time Mrs. Joseph King, president, is to preside.

In the annual report of Mrs. W. G. Davenport, president of the Episcopal Home for Children in Anacostia, which will be published in the near future, strong recommendation is made for the enlargement of the accommodations at the home and also for beautifying the grounds surrounding the institution, at the head of Talbot Street. Plans are being prepared for the erection of a memorial to the late Bishop of Washington, Right Rev. Henry V. Satterlee.

The opening of Shannon Street, from W to V Streets, has been requested of the Commissioners in a petition being circulated for the signatures of property owners and others interested in this matter. The petition states that the opening of the street would eliminate the necessity of having to go an additional five squares in reaching the freight yards of the Baltimore and Ohio Railroad Company.

## MISSIONARIES BRING TRADE

America's part in China's re-awakening was the subject of a lecture by Dr. Isaac Headland at New York Avenue Presbyterian Church last night. Dr. Headland declared that American missionaries in China had blazed the way for commercial exploitation of the country by the big corporations of the United States.

"American commerce with China was practically nil until that country was opened by our missionaries," he said. "Forty years ago you could not find a pound of American goods in all China. To-day the docks at Shanghai, and all the other big ports, are stacked high, not only with our flour, but with wheat from the great Northwest."

"It would pay American business men in hard dollars to invest in foreign missions. The more missionaries we have in China, just so much the quicker will that country and the excellence of things Occidental. The best drummers in the world to-day are the missionaries in China."

## Last Special Award

To Be Given to the Person Casting the Most Votes in THE HERALD'S \$25,000 CONTEST Between February 3 and February 24, 1913.

## A \$750 CONOVER BABY GRAND PIANO

PURCHASED FROM

## Percy S. Foster

PIANOS, MUSIC, AND VICTOR TALKING MACHINES

Foster Building 1330 G St. N. W.

ANY ONE MAY COMPETE FOR THIS SPECIAL AWARD

Not limited to Herald contestants, but all votes must be cast for some contestant

## A Word About the Conover Baby Grand

After careful investigation and comparison of values, The Advocate purchased four \$750 Conover Baby Grand Pianos from Percy S. Foster, to be given as contest awards.

Feeling satisfied that he had made a selection that would win the unanimous approval of contestants, it was natural that, when it came to offering a special award, his choice would again fall on one of these artistic instruments.

The Conover Baby Grand is one of the world's finest small pianos. It is a masterpiece of construction, perfect in tone, and charming in design. The length is 2 feet 5 inches—an ideal size. Striking, felt, keys, and other musical parts are of highest quality.

It has a magnificent mahogany case, and is finished in the most artistic manner. The Conover Baby Grand is endorsed by famous musicians everywhere.
